

# Does Music Help You While You Are Working

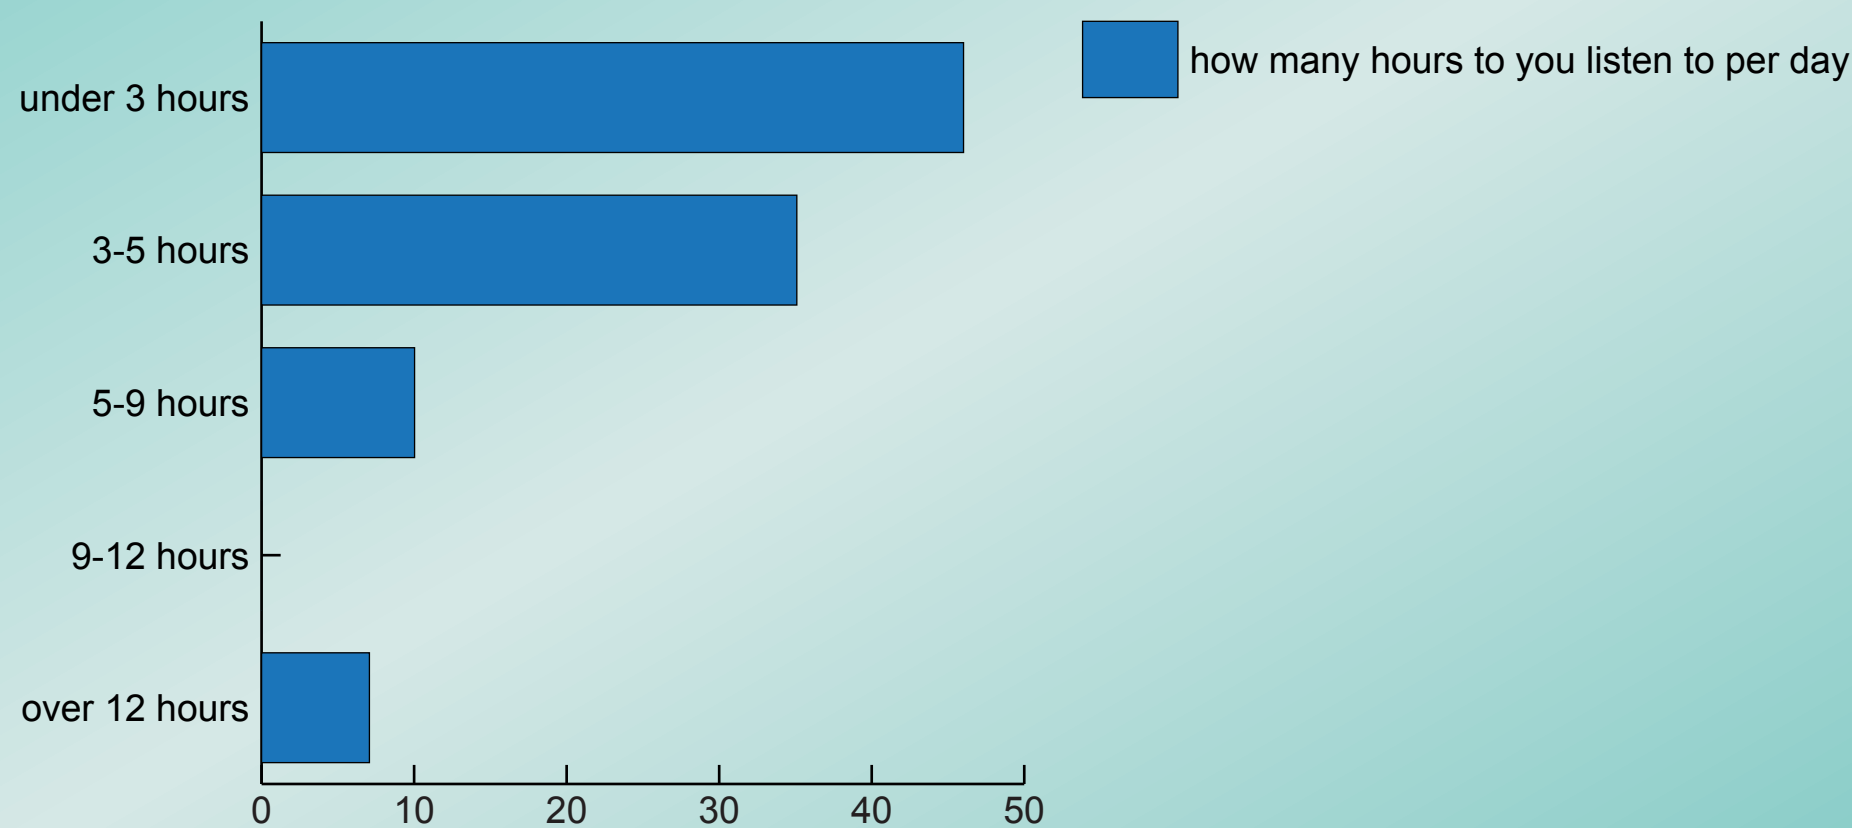

## Or Is It A Distraction?

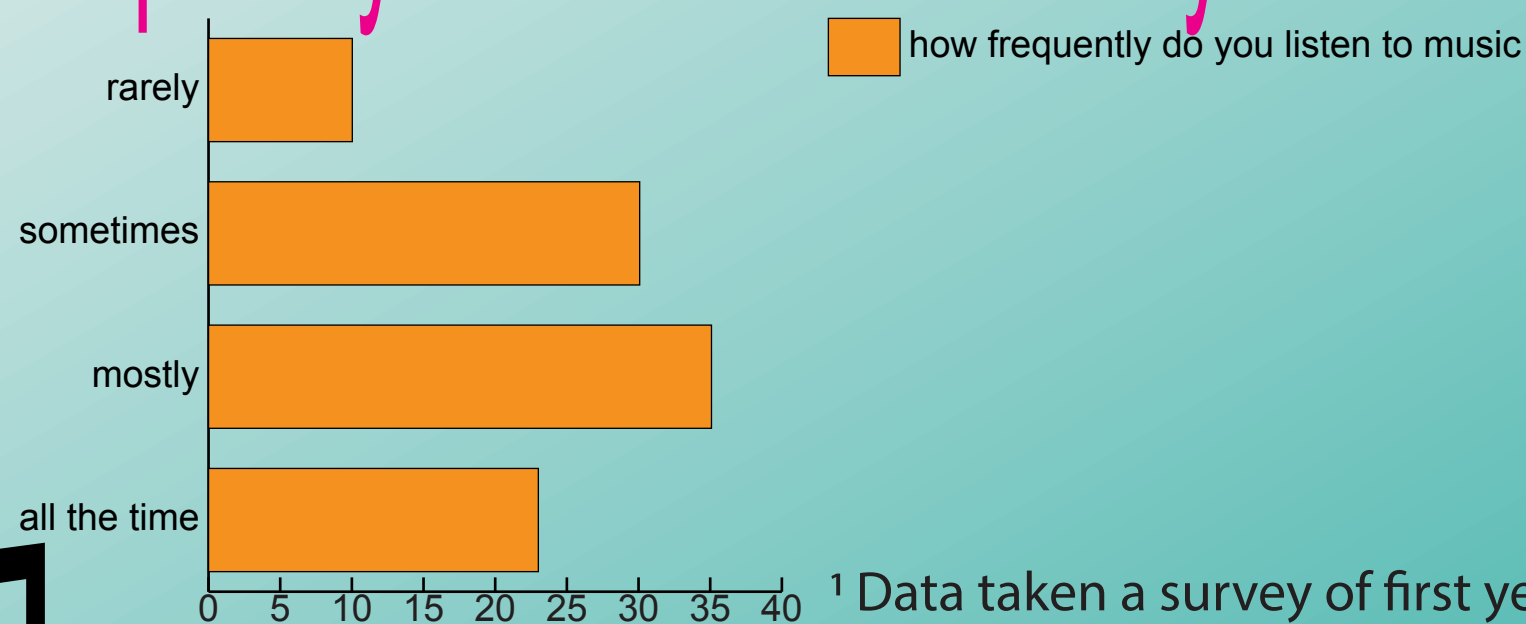

### Types of music genres that people listen to

### Hours that you use to listen to music per day

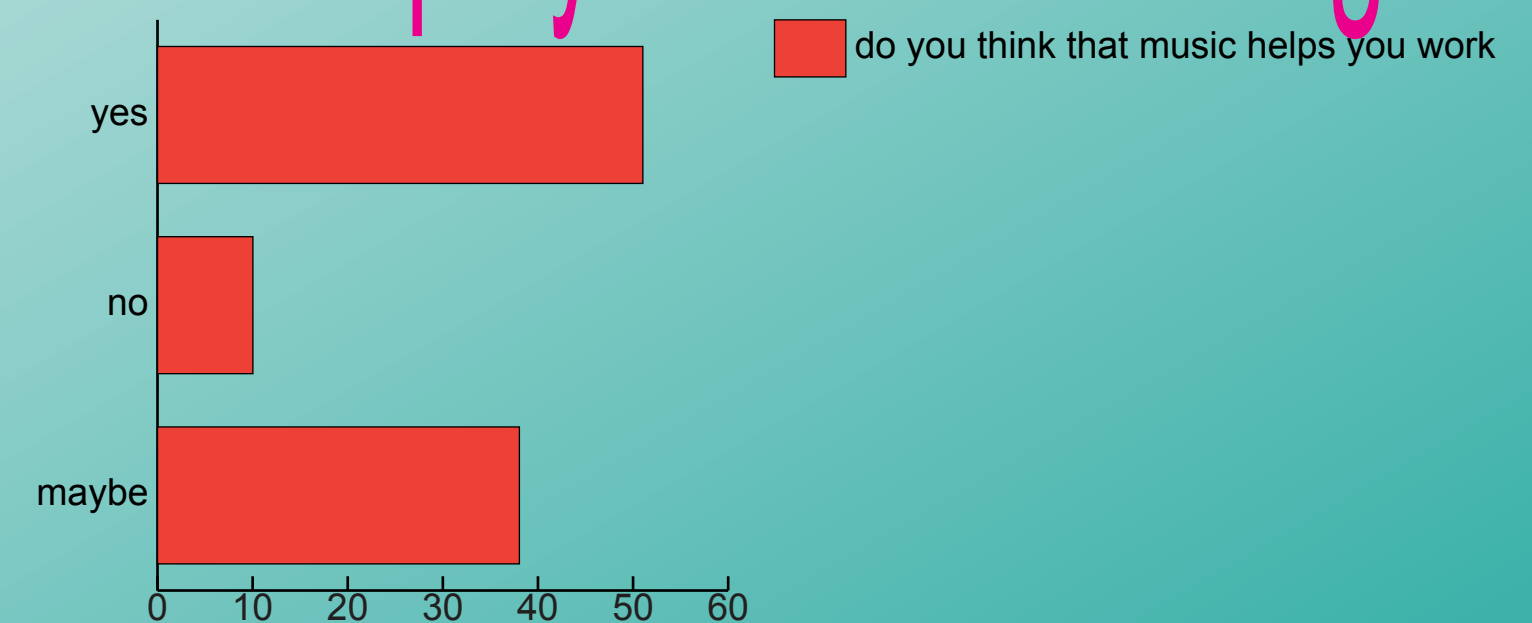

### Frequency of how much time you use to listen to music

Students and teachers in the Graphic & Web Design program often listen to music while they are working. I conducted a survey of first year students in illustration 2, third year students and graphic & web design teachers to see if different types of music can affect different people, how many hours you listen to, the frequency of listening to it, and if music is either helps them or is it a distraction for them.<sup>1</sup>

### Does music helps you while working

### Is music a distraction for you while working

<sup>1</sup> Data taken a survey of first years students, third years students and teachers Graphic & Web Design, conducted on Feb 18,2017
