

About us

Our company is a gaming brand that is developing a controller that lets you stream any game from any existing console on your TV, tablet or phone. If you want to play the game on the go without wi-fi you can buy the game digitally on the UP store and download them to play your games offline.

Games

These games are accessible online along with many other games that can be streamed on this device. The games will include most regular Playstation and Xbox games along with the opportunity to access them anywhere at anytime.

PLAY ANYWHERE

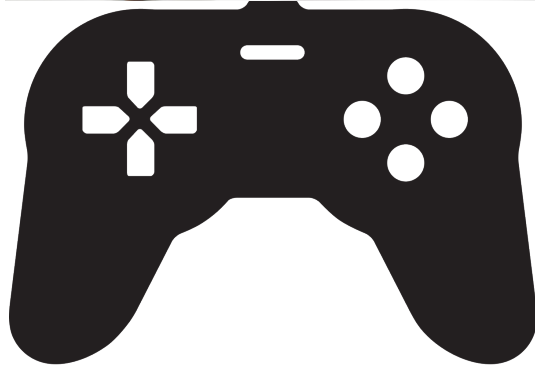

PLAY TOGETHER

PLAY FOREVER

Streaming

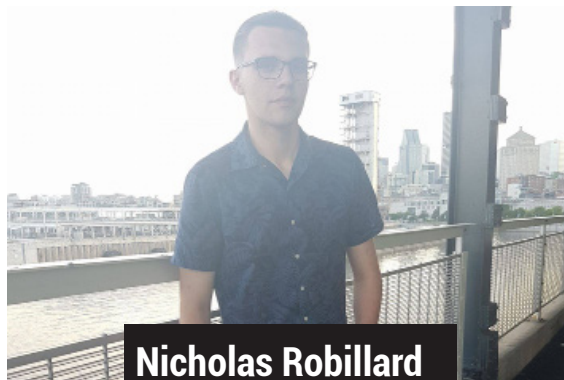

With Ultimate Playground you can stream all the games in 4K resolution if you have a 4K T.V and at 60 frames per second. You can seamlessly play from your tv to your laptop, tablet and mobile phone with no hassle. You can also share your gameplay moments with your friends using the share button on your controller and upload them to the youtube app.

Our Team

Marcello Ruggeri

Marcello Ruggeri is one of the founders of Ultimate Playground. Marcello's goal is to make a console for players to stream games on any device so non-gamers and traditional gamers can both enjoy.

Nicholas Robillard

Nicholas Robillard is one of the founders of this company/product. Both he and Marcello have done courses in graphic and web design and then decided to create this company. His goal is to make a better console that will change the game for the gaming industry.

Features

- Download the games to play games offline without wi-fi
- When you get the Ultimate Playground you get the controller with one game included and a free tablet
- Cloud gaming service
- Save your games on the cloud
- 120 frames per second at 8K resolution
- UP supports the streaming of games in HDR at 60 frames per second in 4K resolution
- Players can record and stream their games on YouTube
- UP developed their own controller which can connect over wi-fi or bluetooth

Mission Statement

ULTIMATE PLAYGROUND

Our goal is to create a controller that appeals to all gamers and that they can play their favorite games wherever they are want, with no hassels. Create a controller that will change the game for the gaming industry. Develop a controller that lets you stream any game from any existing console on your TV, laptop, tablet or phone.
