About us

Welcome to Sweet Paint! We are an environmentally friendly spray paint company, that supports every art form while helping the planet by not using toxic chemicals bad for the earth or humans. We support all artist and art forms around the world and encourage anyone that wants to use spray paint - to use our paint, Spray Smarter!

Not only do we supply an immense selection of various colours and finishes but we also do have our SpraySmart team of sponsored artist from around the world.

With our SpraySmarter team you can visit our website to contract any of our artist for a commission work for whatever project you need, the benefit of booking through us that it is easy, direct, efficient and reliable, and not to mention they use Sweet Paint cans only! so you know its helping the environment, visit our website for more info,

Aerosol

Aerosol can be extremely dangerous for the environment, its scientifically proven to burn holes in our atmosphere which makes it easier for uv rays from the sun to burn us and the planet.

At Sweet paint we wanted to make a paint that is environmentally friendly so that spray painting could be an art form that does not damage the planet we live in.

Our spray paint solution makes your artwork appear almost exactly the same to original spray paint. And maybe even better then that.

Our Paint

Our spray paint is made with a special solution that does not involve aerosol but instead a solution that uses sugar as its base.

We worked heavily to perfect the perfect solution that both makes colours pop and is safer to use for both the painter and the environment.

Many of our sponsored artists prefer our type of paint because of the texture it offers compared to aerosol. It's used as an alternative paint for artwork that needs a special texture.
