INTRODUCTION

Discord is the best way to get involved in your gaming organization, no matter what game you play. Whether it's to just chat with your friends, skip the competitive esports scene, create your own organization or just to get back in touch with people, Discord is the way to go. With tons of features and bots to help with the organization, Discord is a simple yet powerful tool that can replace programs like Skype, that just aren't made for the gaming community.

- ZACH TAILLEFER

Introduction chapter for a printed and electronic version of a manual developed for Discord.
